

# The En-Powered Woman

Leading with courage, clarity and confidence

Prefix: en – meaning the energy within thereby reclaiming her inner power

“Where there is a purpose, there is always a path”.

The time has never been better to claim your leadership role in co-creating where all people prosper – from the people you work with to the communities we serve. The en-powered woman brings a unique voice and experience to the workplace, forges a road ahead that supports the many that follow her, knows who she is, what she stands for and the difference she can make.

Ntuitive and wise, she not only nurtures those around her, she backs herself to make the hard calls with a brave heart when it is needed so that the ‘good of all’ is upheld over the ‘good of the few’. She is present; listens, seeks to understand and speaks her truth with care and compassion.

Understanding energy and the cycles of nature, she recognises when she must pull back and ‘go within’ to reflect, recalibrate, review and renew herself to take advantage of the next cycle of growth and evolution.
